The world of mobile money is rapidly evolving, building on successful services such as airtime top-up, recharge, money transfer and bill payment to extended advanced mobile financial services into any market.eServGlobals Pay Mobile platform is an end to end solution for mobile money and mobile financial Services.

Responsibilities:

- Worked on Design & Development at UI's.
- Worked on Integrating Soap Web services.
- Worked On SQLite for local storage.

Project#5:

Smart Data Enterprises Pvt Ltd	
Project	Fit Finder
Client	John Wooseley.
Role	Software Engineer
Team Size	2
Environment/Technologies	Xcode 6.0/6.2, MAC OS and Objective C

Description:

The purpose of the application is to help consumers easily find a nearby place to exercise, such as a gym, yoga studio, etc. It will also provide information on upcoming events (like marathons etc.) as well as online workout programs like Legion Training. Once I find something I want more information on, I can access a "profile" with basic information, buy a membership or a coupon (think group on), read/write reviews, go to the businesses website, and of course call them. In addition, the app will provide content such as workout videos and blogs. Businesses are going to be one of the main revenue drivers for this, as we will take a small percentage of memberships and deals purchased. In exchange, businesses get access to great statistics like how many times their page was viewed, where its being viewed geographically/demographically, how many calls they are getting, and the ability to edit their profile page (or hide it, should they choose).

Responsibilities:

- Designing the views using Storyboard.
- Integrated Twillio,, Stripe API for this application.
- Application developed Universal compatibility (Both iPhone and iPad).
- Integrate Face book Share, Twitter Share and Google +.

Project#6:

Smart Data Enterprises Pvt Ltd	
Project	DealsApp
Client	Apple Fiel
Role	Software Engineer
Team Size	1
Environment/Technologies	Xcode 5.0/5.1, MAC OS and Objective C

Description:
